

NEUTRONLUB

THE BEST HI-TECH FLUID & COMPOUNDS - USA

NEUTRON 999 FOOD GRADE GREASE CONTAMINATION RESISTANT - USDA H1

Neutron 999 Food grade Greases Impervious to water and steam and will not wash out during daily or severe cleaning procedures. This family of greases gives long term rust and corrosion protection for all bearing designs and equipment parts. Neutron 999 greases are water clear with high drop points (over 500°F/260°C) for excellent temperature stability, combined with maximum water and detergent contamination resistance. These lubricants are perfect choices for all food and beverage processing equipment when extensive wash downs are needed to maintain proper cleanliness.

- Excellent pump ability
- Low temperature service
- Severe environment protection
- Available in attractive white color
- Neutron 999 #1 for automatic and central lube systems
